| Citation | Requirement | Applies to Subpart NNNNN | Explanation |
|---|---|---|---|
| §63.10(b)(3) ............................ | Recordkeeping requirements for applicability determinations. | Yes. | |
| §63.10(c) ................................ | Additional recordkeeping requirements for sources with CMS. | Yes .................................... | Applies as modified by §63.9005(d). |
| §63.10(d)(1) ............................ | General reporting requirements. | Yes .................................... | §63.9050 specifies additional reporting requirements. |
| §63.10(d)(2) ............................ | Performance test results ......... | Yes. | |
| §63.10(d)(3) ............................ | Opacity or visible emissions observations. | No ...................................... | Subpart NNNNN does not specify opacity or visible emission standards. |
| §63.10(d)(4) ............................ | Progress reports for sources with compliance extensions. | Yes. | |
| §63.10(d)(5) ............................ | SSM reports ............................ | Yes. | |
| §63.10(e)(1) ............................ | Additional CMS reports—general. | Yes .................................... | Applies as modified by §63.9005(d). |
| §63.10(e)(2)(i) ......................... | Results of CMS performance evaluations. | Yes .................................... | Applies as modified by §63.9005(d). |
| §63.10(e)(2)(ii) ........................ | Results of COMS performance evaluations. | No ...................................... | Subpart NNNNN does not require the use of COMS. |
| §63.10(e)(3) ............................ | Excess emissions/CMS performance reports. | Yes. | |
| §63.10(e)(4) ............................ | Continuous opacity monitoring system data reports. | No ...................................... | Subpart NNNNN does not require the use of COMS. |
| §63.10(f) ................................ | Recordkeeping/reporting waiver. | Yes. | |
| §63.11 ................................... | Control device requirements—applicability. | No ...................................... | Facilities subject to subpart NNNNN do not use flares as control devices. |
| §63.12 ................................... | State authority and delegations. | Yes .................................... | §63.9070 lists those sections of subparts NNNNN and A that are not delegated. |
| §63.13 ................................... | Addresses ............................... | Yes. | |
| §63.14 ................................... | Incorporation by reference ...... | Yes .................................... | Subpart NNNNN does not incorporate any material by reference. |
| §63.15 ................................... | Availability of information/confidentiality. | Yes. | |

## Subpart OOOOO [Reserved]

## Subpart PPPPP—National Emission Standards for Hazardous Air Pollutants for Engine Test Cells/Stands

WHAT THIS SUBPART COVERS

### §63.9280 What is the purpose of subpart PPPPP?

This subpart PPPPP establishes national emission standards for hazardous air pollutants (NESHAP) for engine test cells/stands located at major sources of hazardous air pollutants (HAP) emissions. This subpart also establishes requirements to demonstrate initial and continuous compliance with

the emission limitations contained in this NESHAP.

### § 63.9285  Am I subject to this subpart?

You are subject to this subpart if you own or operate an engine test cell/stand that is located at a major source of HAP emissions.

(a) An engine test cell/stand is any apparatus used for testing uninstalled stationary or uninstalled mobile (motive) engines.

(b) An uninstalled engine is an engine that is not installed in, or an integrated part of, the final product.

(c) A major source of HAP emissions is a plant site that emits or has the potential to emit any single HAP at a rate of 10 tons (9.07 megagrams) or more per year or any combination of HAP at a rate of 25 tons (22.68 megagrams) or more per year.

### § 63.9290  What parts of my plant does this subpart cover?

This subpart applies to each new, reconstructed, or existing affected source.

(a) *Affected source.* An affected source is the collection of all equipment and activities associated with engine test cells/stands used for testing uninstalled stationary or uninstalled mobile (motive) engines located at a major source of HAP emissions.

(1) *Existing affected source.* An affected source is existing if you commenced construction or reconstruction of the affected source on or before May 14, 2002. A change in ownership of an existing affected source does not make that affected source a new or reconstructed affected source.

(2) *New affected source.* An affected source is new if you commenced construction of the affected source after May 14, 2002.

(3) *Reconstructed affected source.* An affected source is reconstructed if you meet the definition of reconstruction in § 63.2 of subpart A of this part and reconstruction is commenced after May 14, 2002. Changes made to an existing affected source primarily for the purpose of complying with revisions to engine testing requirements under 40 CFR parts 80, 86, 89, 90, 91, or 92 are not considered a modification or reconstruction. In addition, passive meas-

urement and control instrumentation and electronics are not included as part of any affected source reconstruction evaluation.

(b) Existing affected sources do not have to meet the requirements of this subpart and of subpart A of this part.

(c) Any portion of a new or reconstructed affected source located at a major source that is used exclusively for testing internal combustion engines with rated power of less than 25 horsepower (hp) (19 kilowatts(kW)) does not have to meet the requirements of this subpart and of subpart A of this part except for the initial notification requirements of § 63.9345(b).

(d) Any portion of a new or reconstructed affected source located at a major source that meets any of the criteria specified in paragraphs (d)(1) through (4) of this section does not have to meet the requirements of this subpart and of subpart A of this part.

(1) Any portion of the affected source used exclusively for testing combustion turbine engines.

(2) Any portion of the affected source used exclusively for testing rocket engines.

(3) Any portion of the affected source used in research and teaching activities at facilities that are not engaged in the development of engines or engine test services for commercial purposes.

(4) Any portion of the affected source operated to test or evaluate fuels (such as knock engines), transmissions, or electronics.

### § 63.9295  When do I have to comply with this subpart?

(a) *Affected sources.*

(1) If you start up your new or reconstructed affected source before May 27, 2003, you must comply with the emission limitations in this subpart no later than May 27, 2003.

(2) If you start up your new or reconstructed affected source on or after May 27, 2003, you must comply with the emission limitations in this subpart upon startup.

(b) *Area sources that become major sources.* If your new or reconstructed affected source is located at an area source that increases its emissions or
